

The 2020 vision Rally

TuesdAY 13th april 2021

A compact and concise run around some classic roads in Nottinghamshire on Map 129 (latest edition), organised by Richard Lumb.

Start from Ruddington Country Park MC1 at 129/577323. Drive beyond this point and there will be room to assemble and plot on the industrial estate roads. Car 0 is at 2100 hrs (later than usual) to allow darkness to descend.

Control locations and timing will follow Covid-19 precautions and be provided by the Rally Live app. It is therefore essential that the navigator has the app loaded before the event and takes responsibility for having a fully-charged phone. Marshals will be out to observe give way junctions and perform 'envelope checks'; this means that marshals will be present on the route but will not be expected to stick their heads through the window of your car. Passage checks will be recorded by crews.

Navigation is on a theme but will be straightforward without undue tricks. There are help sheets for non-experts and additional 60 minutes plotting time for beginners.
